**STB** with Easy Trigger Technology

## Battery Hand Tools for Plastic Strapping

### Easy to Use

Easy Trigger Technology delivers ergonomic and efficient operation to reduce strain on user

### Improved Performance

Innovation and latest battery technology provide improved productivity

### Enhanced Reliability

High quality materials and Swiss precision maximize operational reliability

### Flexible Operation

Intuitive operation via the display for a wide range of applications

# STB with EasyTrigger Technology

## Battery Hand Tools for Plastic Strapping

The next generation battery Hand Tool for plastic strapping, the STB with Easy Trigger Technology, can take your operations to a higher level. The advanced technologies and ergonomic design of the STB Hand Tools fit into your advanced packaging process.

## Benefits and Features

### ■ Simplified strapping process

Easy Trigger Technology activates the strapping process with a simple finger pull to insert and remove the strap. This simple process and optimized tool balance reduces operator fatigue and makes the operation easier, regardless of the strapping application.

### ■ Increased productivity

Increased efficiency due to the unique, ergonomic handling and advanced performance of the latest AMPShare® battery generation from BOSCH®.

### ■ Enhanced reliability

High-quality materials, including wear parts, meet the highest quality standards and are made of heat-treated tool steel or powder metallurgical material.

## Highlights

### ■ Advanced ergonomics

For increased efficiency and usability

- Intuitive and simple user interface
- Balanced design for easy operation
- Quick to learn and use

### ■ High performance

For enhanced power and productivity

- Maximum control through fine adjustment of the tension force, tension speed and welding
- Optical control element for correct strap insertion
- Latest AMPShare® battery generation

### ■ Reliable quality

For more consistent operation

- High quality components
- DEKRA-tested and certified
- Swiss made
